

Screenings

Health Screenings are done on all students unless we have obtained the required information from the sports physical completed June 1st or after for the new school year.

1. Height, weight and blood pressure will be done on all students.
2. Hearing screenings will be done on all students in grade 7.
3. Vision screenings will be done on all students in grade 8.
4. SCOLIOSIS screening will be done on students in grade 7. Scoliosis is a disease that causes the spine to curve. State law NJSA 18A:40-4.3 requires screening for scoliosis to be conducted biennially for students between the ages of 10 and 18. If you prefer to have your child examined by your own health care provider, at your expense, a note from your physician stating that your child has had a scoliosis examination must be submitted to the school nurse by December 1, 2020. Scoliosis screenings will likely be scheduled for after the winter break for the 2020-2021 school year.
5. State guidelines are followed to monitor immunization records on all students.
